

OUR SIGNAGE PROCESS

Consultation

Here at JSI Signage, we always put the client first. It is important to us to understand your vision, requirements, and budget to help you select the best options.

Site Assessment/ Blueprint Review

Before we get to work, we will review your blueprint or even visit your site to have a clear idea of what's needed.

Plan Development

Once we know what you are looking for, we start creating a detailed plan for you, which usually includes a sample floor plan, drawings, sign specifications and professional signage schedule with a table of quantities.

Design Approval

This is where your vision comes to life. We design your signs according to your input from the consultation, and once approved, we move on to production.

Production/Shipping

Using the approved designs, we get to work and start production. The production timeline will depend on the sign quantities and materials, which could be Aluminum, Vinyl, Brass, Acrylic and many more.

Installation

We install your new signage on-site, ensuring a neat, orderly process that minimizes disruptions. What's more, we don't stop there. We also offer ongoing support.

Ongoing Support

We are with you all the way! We provide a one-year guarantee on our work, and even after that time, we are committed to being available to service your signage or provide maintenance information.
